1. Overview

This guide helps you in configuring **ProtectWise** with EventTracker to receive **ProtectWise** events. In this guide, you will find the detailed procedures required for monitoring **ProtectWise**.

EventTracker's built-in knowledge pack enables you to gather business intelligence providing increased security, performance, availability, and reliability of your systems.

Through alerts, knowledge base solutions, and reports, EventTracker helps you correct problems long before a disastrous failure occurs.

2. Prerequisites

- **EventTracker v9.2 or above** should be installed.
- **ProtectWise** should be configured.
- **Port 514** should be open.
- **EventTracker Public IP** is required.

3. Integration of ProtectWise with EventTracker

Configuring syslog Message Forwarding

Update the **protectwise-emitter.json** file

- In the **udpAdapters**, set the **Host** as **EventTracker Public IP**.
- Set **Port** to **514**.

```
"udpAdapters": [  
  {  
    "host": "<dest_ip>",  
    "name": "udp",  
    "port": 514  
  }  
]
```

Run the **protectwise-emitter**. EventTracker will start receiving ProtectWise logs.
