

Actionable Security Intelligence

## Integrate HP ProCurve Switch

## Abstract

This guide provides instructions to configure HP ProCurve Switch to send the event logs to EventTracker. Once events are configured to send to EventTracker Manager, alerts, dashboards and reports can be configured into EventTracker.

## Scope

The configurations detailed in this guide are consistent with **EventTracker Enterprise version 7.X and later**, and **HP 2520G,HP 2520,HP 2530,HP 2615,HP 2620,HP 2910al,HP 2915,HP 2920,HP 3500,HP 3500yl,HP 3800,HP 5400zl,HP 6200yl and HP 8200zl**.

## Audience

HP ProCurve Switch users, who wish to forward event logs to EventTracker Manager and monitor events using EventTracker.

*The information contained in this document represents the current view of EventTracker. on the issues discussed as of the date of publication. ## Overview

Hp ProCurve switches are a series of layer 2 and layer 3 switches ideal for high-performance and secure Gigabit connectivity. EventTracker aggregates and deduces informative events to provide an insight on user behavior and security violations.

## Prerequisites

- EventTracker v7.x and later should be installed.
- Console access by **telnet** or **ssh** must be enabled on ProCurve switch.

## Enable Syslog forwarding on HP ProCurve Switch

### Configure Syslog Server

- **Telnet/SSH** to switch console.
- Logon with **Admin** account.
- Enter **Config Mode**.
- Type following commands:

```
logging facility syslog
logging 192.168.X.X
(192.168.X.X is ip address of EventTracker manager)
```

- **Save** configuration and **exit**.  
**NOTE:** Please add **port 514** to firewall exception, if applicable.

## EventTracker Knowledge Pack (KP)

Once logs are received in EventTracker; categories, alerts, reports and dashboards can be configured in EventTracker.

The following Knowledge Packs are available in EventTracker v7 and later to support HP ProCurve switch monitoring:

## Categories

- **HP ProCurve Console Session Established** - This category based report provides information related to launch of console sessions.
- **HP ProCurve Security Violation Detected** - This category based report provides information related to network security violations.
- **HP ProCurve System Authentication Failed** - This category based report provides information related to system authentication failure.
- **HP ProCurve System Configuration Changed** - This category based report provides information related to switch configuration file modification.
- **HP ProCurve User Logon Failed** - This category based report provides information related to user logon failure.

## Alerts

- **HP ProCurve System Authentication Failed** - This alert is generated when system authentication fails.
- **HP ProCurve User Logon Failed** - This alert is generated when user logon fails.

## Reports

- **HP ProCurve-Port Status Change Details** - This report provides information related to status change of switch port.
- **HP ProCurve-Security Violation Details** - This report provides information related to security violations detected.
- **HP ProCurve-User Logon Details** - This report provides information related to user logon and logoff.

## Knowledge Objects

- **HP ProCurve-Port Status Change Details** - This KO assists in evaluation of switch port status.
- **HP ProCurve-Security Violation Details** - This KO assists in evaluation of potential security breach.
- **HP ProCurve-User Logon Details** - This KO assists in evaluation of user logon activities.

# Import Knowledge Pack into EventTracker

1. Launch **EventTracker Control Panel**.
2. Double click **Export/Import Utility**, and then click the **Import** tab.

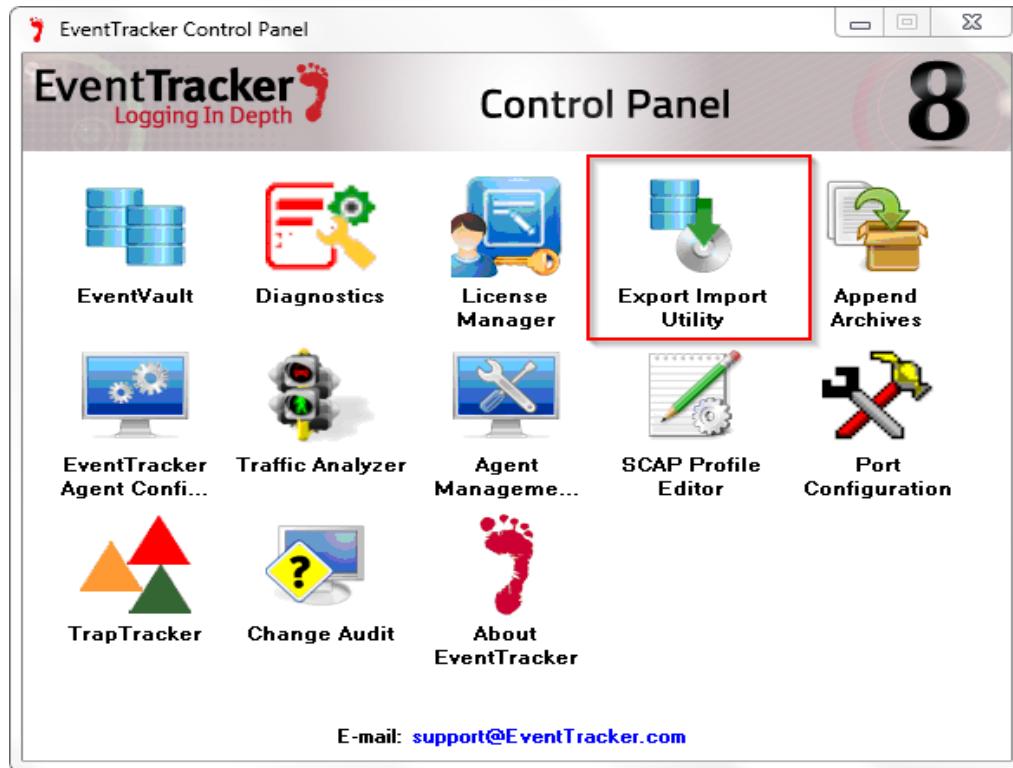

Figure 1

3. Import **Categories/Alerts/Templates/Flex Reports/Knowledge Objects** as given below.

## Import Categories

1. Click **Category** option, and then click the 'browse'  button.

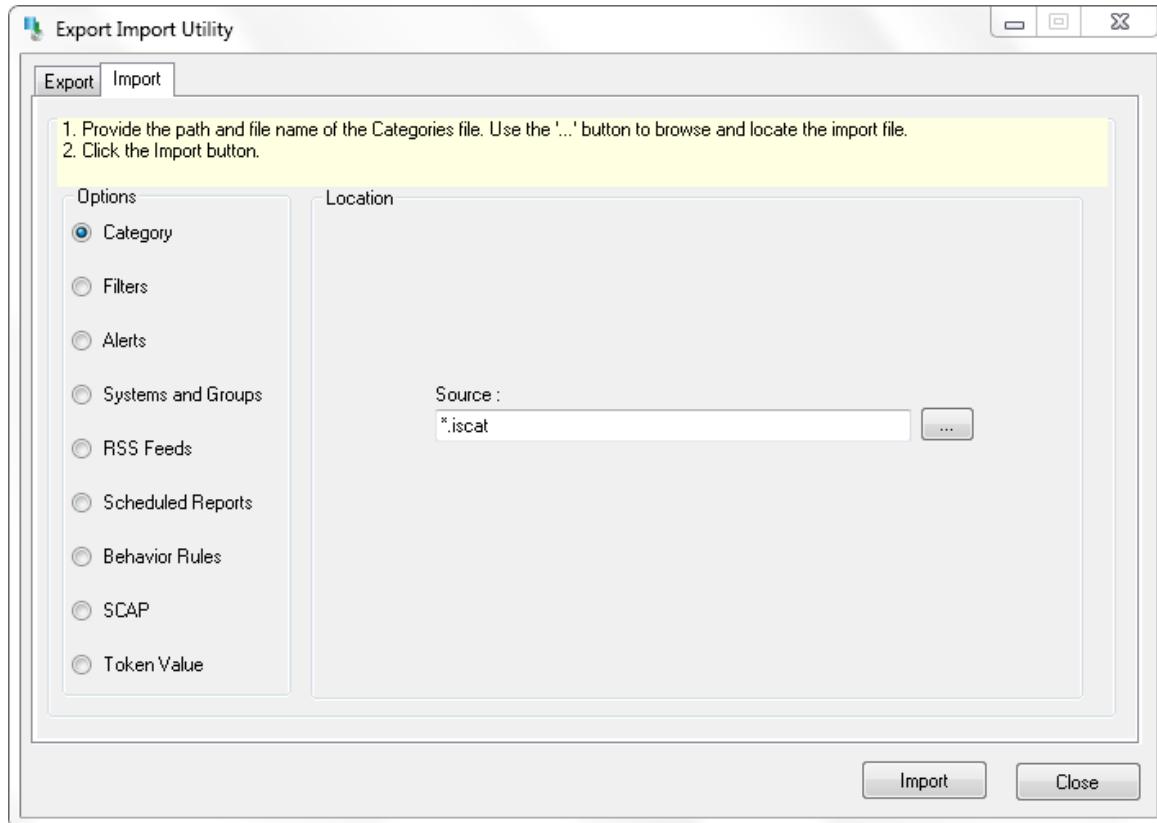

Figure 2

2. Locate applicable '**All HP ProCurve Switch categories.iscat**' file, and then click the **Open** button.
3. To import categories, click the **Import** button.

EventTracker displays success message.

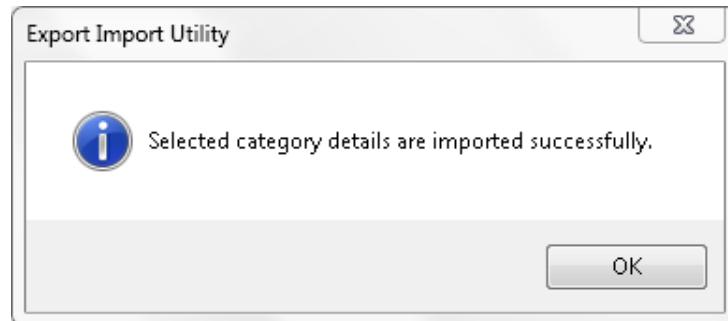

Figure 3

4. Click **OK**, and then click the **Close** button.

## Import Alerts

1. Click **Alert** option, and then click the '**browse**'  button.

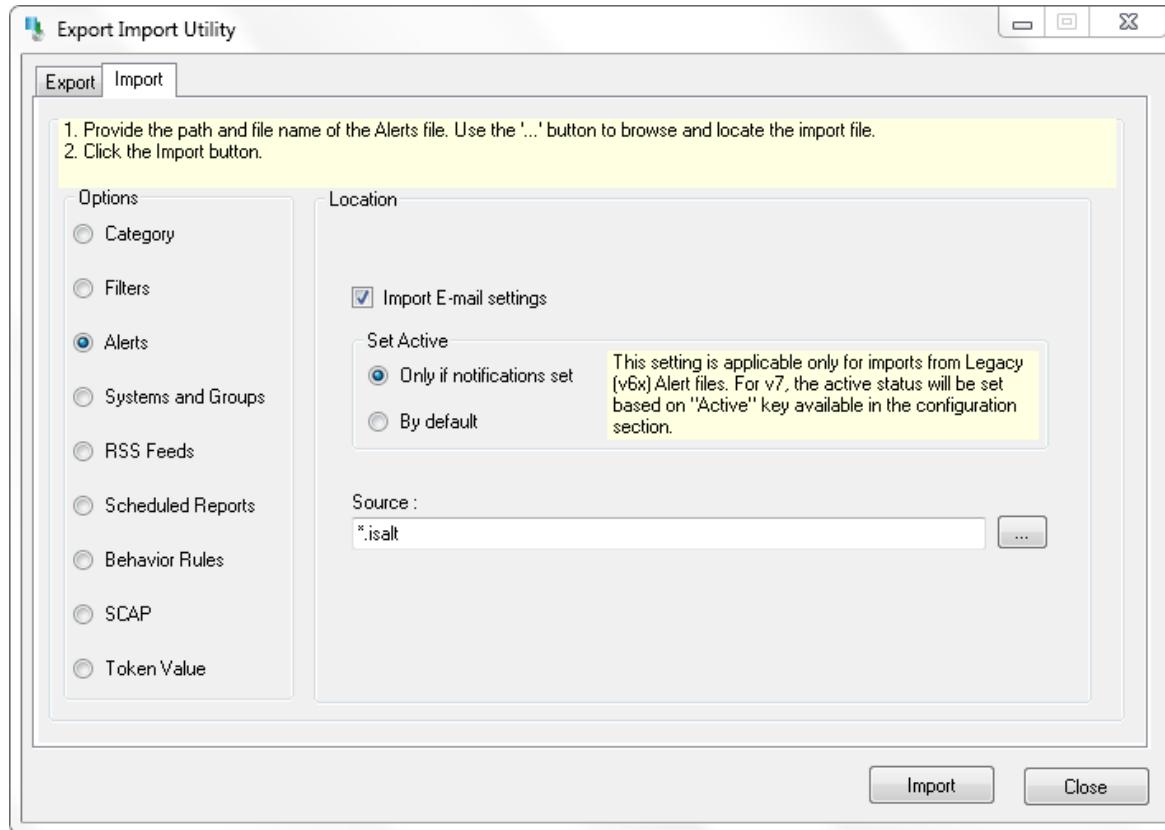

Figure 4

2. Locate applicable '**All HP ProCurve Switch alerts.isalt**' file, and then click the **Open** button.
3. To import alerts, click the **Import** button.

EventTracker displays success message.

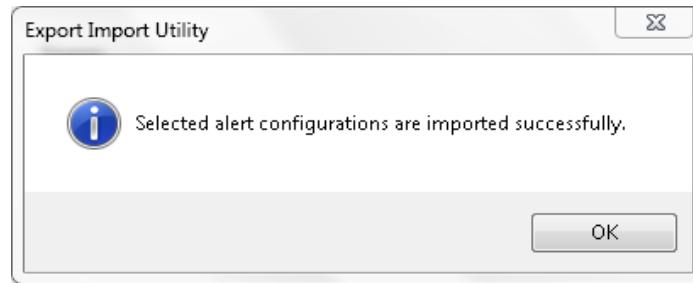

Figure 5

4. Click **OK**, and then click the **Close** button.

## Import Flex Reports

1. Click **Scheduled Reports** option, and then click the ‘browse’  button.
2. Locate applicable ‘All HP ProCurve Switch reports.issch’ file, and then click the **Open** button.

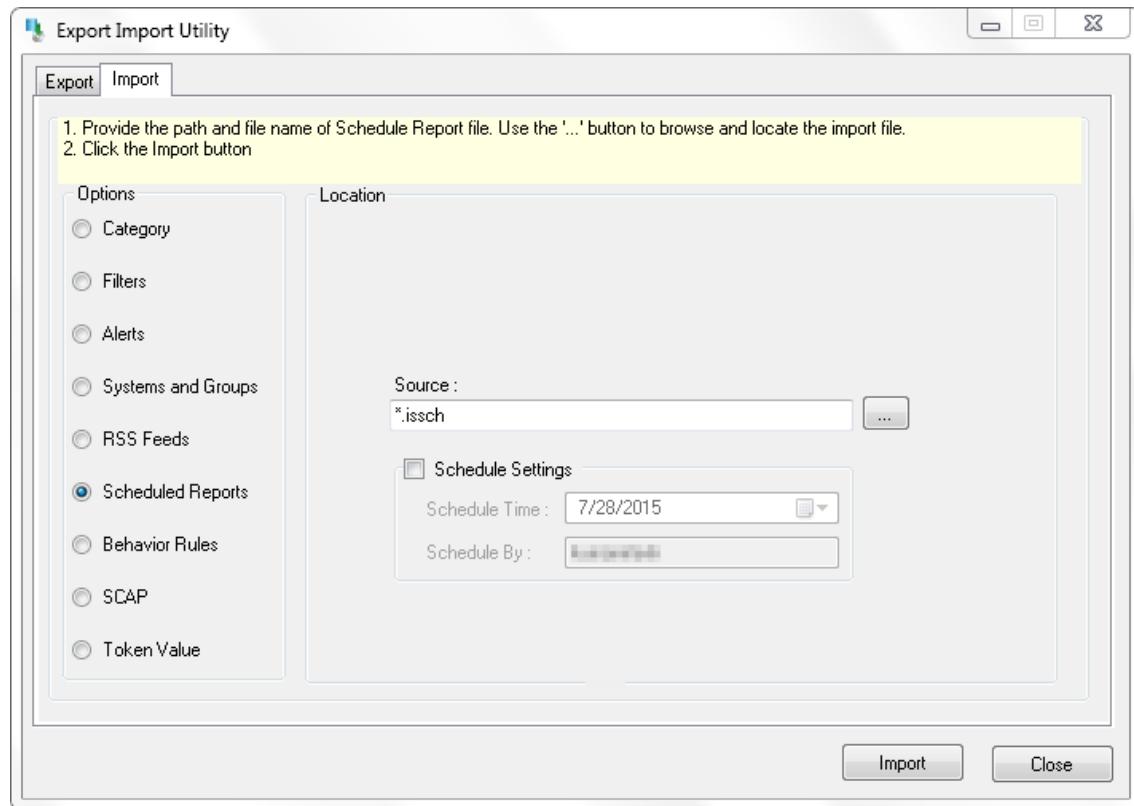

Figure 6

3. To import scheduled reports, click the **Import** button.  
EventTracker displays success message.

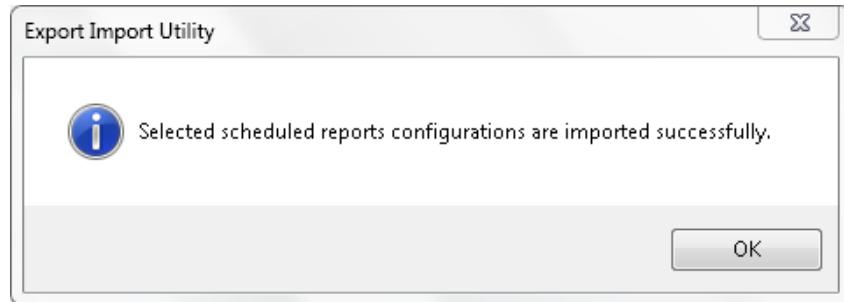

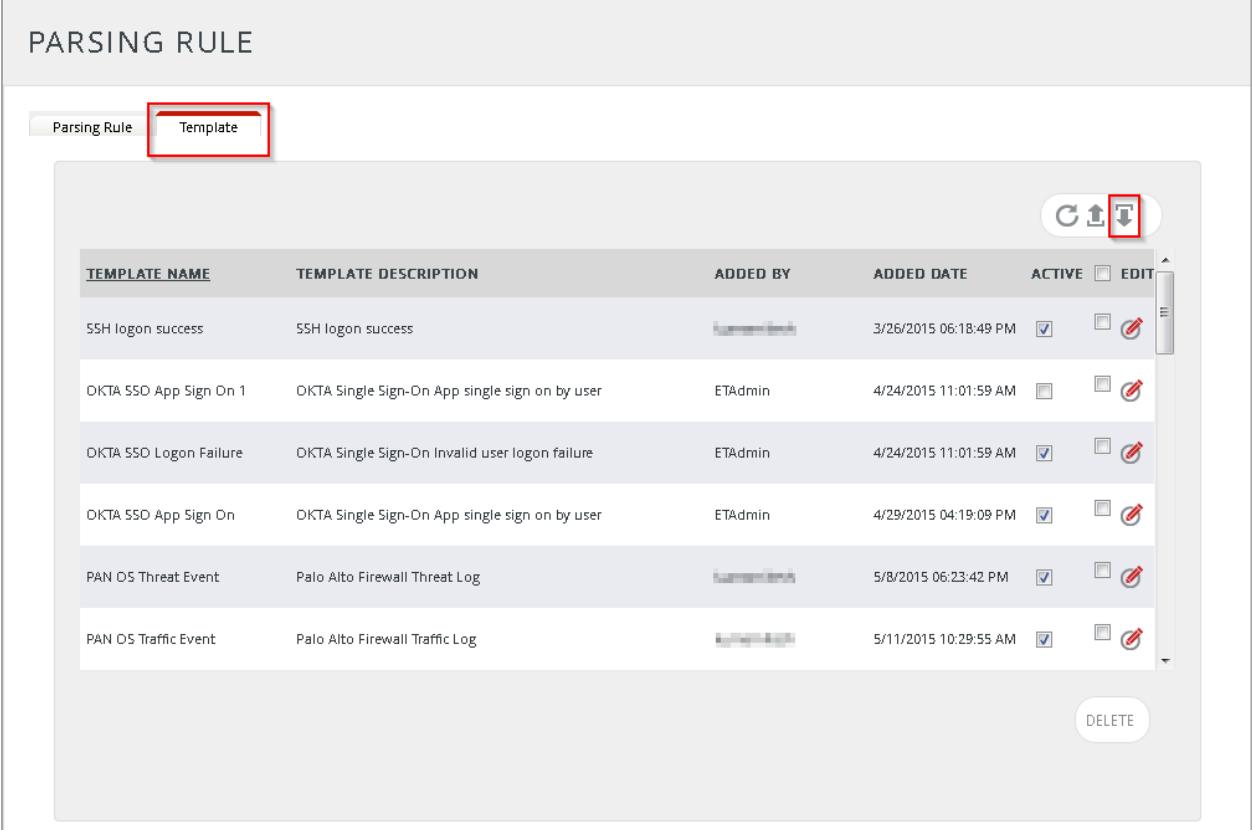

Figure 7

4. Click **OK**, and then click the **Close** button.

## Import Token Templates

1. Click the **Admin** menu, and then click **Parsing rule**.
2. Select **Template** tab, and then click on  'Import' option.

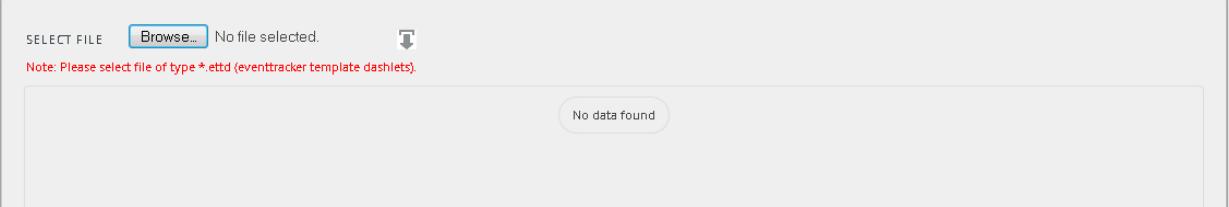

**PARSING RULE**

TEMPLATE NAME	TEMPLATE DESCRIPTION	ADDED BY	ADDED DATE	ACTIVE	<input type="checkbox"/> EDIT
SSH logon success	SSH logon success	[REDACTED]	3/26/2015 06:18:49 PM	<input checked="" type="checkbox"/>	
DKTA SSO App Sign On 1	DKTA Single Sign-On App single sign on by user	ETAdmin	4/24/2015 11:01:59 AM	<input type="checkbox"/>

Figure 10

5. Now select the check box and then click on  'Import' option  
EventTracker displays success message.

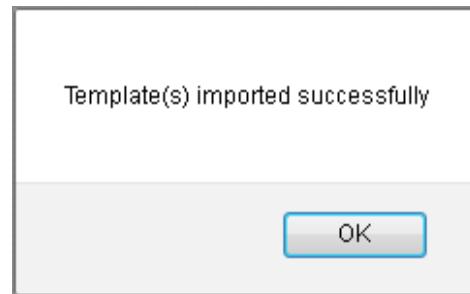

Figure 11

6. Click on **OK** button.

## Import Knowledge Object

1. Click the **Admin** menu, and then click **Knowledge Objects**.
2. Click on  'Import' option.

Figure 12

3. In **IMPORT** pane click on **Browse** button.

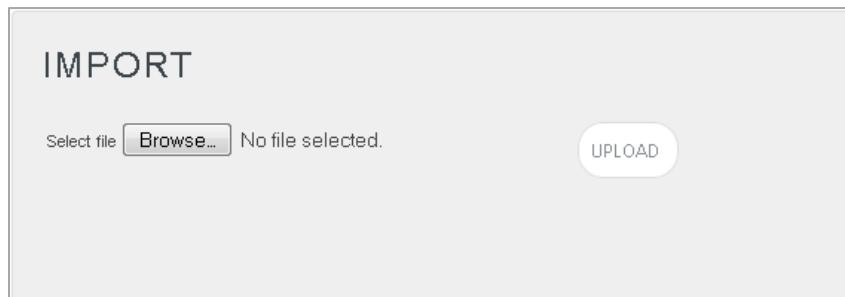

Figure 13

4. Locate applicable 'All HP ProCurve Switch knowledge objects.etko' file, and then click the **UPLOAD** button.

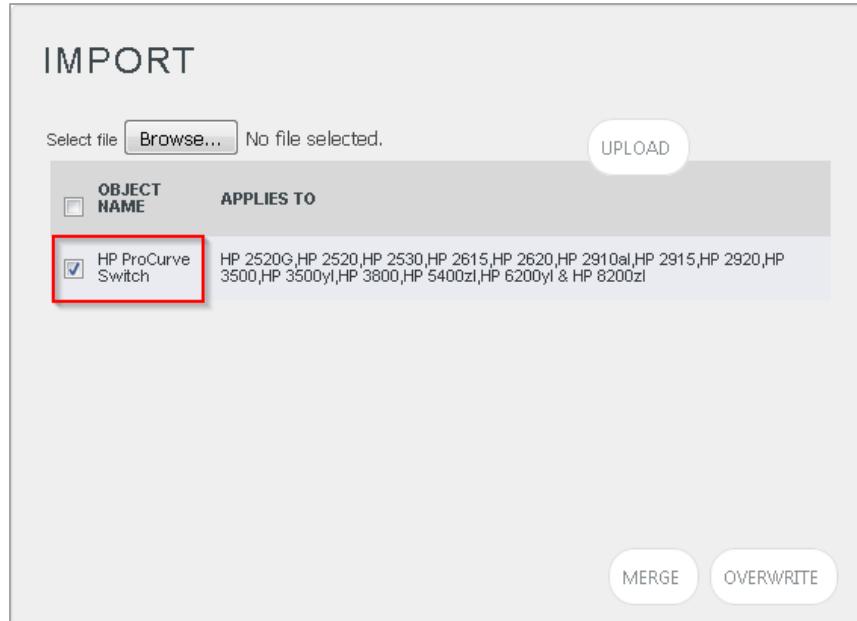

Figure 14

- Now select the check box and then click on ‘**MERGE**’ option.
- EventTracker displays success message.

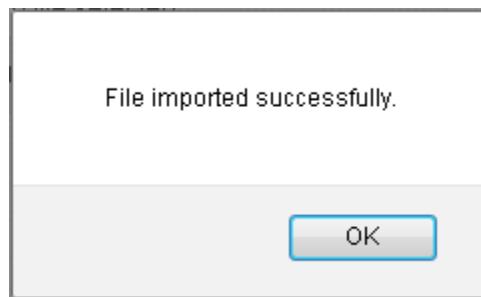

Figure 15

- Click on **OK** button.

## Verify Knowledge Pack in EventTracker

### Verify Categories

- Logon to **EventTracker Enterprise**.
- Click the **Admin** menu, and then click **Categories**.
- To view the imported categories, in the **Category Tree**, expand **HP ProCurve Switch** group folder.

The screenshot shows the 'Category Management' interface. On the left, there's a 'Category Tree' sidebar with various network device categories like DigitalPersona Pro, DoubleTake, eDirectory, EventTracker, F5 BIG-IP, FortiAnalyzer, Fortigate, Fortimail, HP ProCurve Switch, Imperva, Juniper JUNOS, Juniper SBR, Linux, and Linux Cracking. The 'HP ProCurve Switch' node and its sub-nodes ('Hp ProCurve Console Session Established', 'Hp ProCurve Security Violation Detected', 'Hp ProCurve System Authentication', 'Hp ProCurve System Configuration Change', and 'Hp ProCurve User Logon Failure') are highlighted with a red box. The main panel displays statistics: 'Total category groups: 348' and 'Total categories: 3,114'. Below this is a table titled 'Last 10 modified categories' with columns 'NAME', 'MODIFIED DATE', and 'MODIFIED BY'. The table lists ten entries, all modified by 'ETAdmin' on different dates between 9/14/2015 and 9/23/2015.

NAME	MODIFIED DATE	MODIFIED BY
Hp ProCurve User Logon Failure	9/23/2015 03:30:15 PM	ETAdmin
HP ProCurve System Configuration Change	9/23/2015 03:29:59 PM	ETAdmin
HP ProCurve System Authentication Failed	9/23/2015 03:29:45 PM	ETAdmin
Hp ProCurve Security Violation Detected	9/23/2015 03:29:31 PM	ETAdmin
HP ProCurve Console Session Established	9/23/2015 03:29:14 PM	ETAdmin
OpenDNS: All activities	9/14/2015 04:42:06 PM	
OpenDNS: Allowed and blocked activities	9/14/2015 04:42:06 PM	
OpenDNS: Security activities	9/14/2015 04:42:06 PM	
WatchGuard XTM: Authentication failure	9/14/2015 10:30:41 AM	
WatchGuard XTM: Authentication success	9/14/2015 10:30:41 AM	

Figure 16

## Verify Alerts

1. Logon to **EventTracker Enterprise**.
2. Click the **Admin** menu, and then click **Alerts**.
3. In the **Search** box, type '**HP ProCurve**', and then click the 'search' button.  
Alert Management page will display all the imported alerts.

The screenshot shows the 'ALERT MANAGEMENT' interface. At the top, there's a search bar with the 'HP' logo and a magnifying glass icon. Below it is a table with columns: ALERT NAME, THREAT, ACTIVE, E-MAIL, MESSAGE, RSS, FORWARD AS SNMP, FORWARD AS SYSLOG, REMEDIAL ACTION AT CONSOLE, REMEDIAL ACTION AT AGENT, and APPLIES TO. Two rows of alerts are listed, both of which have their 'ACTIVE' checkboxes checked (indicated by a blue checkmark). The first alert is 'HP ProCurve System Authentication...' and the second is 'HP ProCurve User Logon Failure'. Both alerts are categorized under 'High' threat level and apply to 'HP 2520G,HP 25...'. A red box highlights the 'ACTIVE' column for both rows.

ALERT NAME	THREAT	ACTIVE	E-MAIL	MESSAGE	RSS	FORWARD AS SNMP	FORWARD AS SYSLOG	REMEDIAL ACTION AT CONSOLE	REMEDIAL ACTION AT AGENT	APPLIES TO
HP ProCurve System Authentication...	High	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	HP 2520G,HP 25...
HP ProCurve User Logon Failure	High	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	HP 2520G,HP 25...				

Figure 17

4. To activate the imported alerts, select the respective checkbox in the **Active** column and then click the **Activate Now** button.

EventTracker displays message box.

Figure 18

5. Click **OK**.

**NOTE:** Please specify appropriate **systems** in **alert configuration** for better performance.

## Verify Flex Reports

1. Logon to **EventTracker Enterprise**.
2. Click the **Reports** menu, and then **Configuration**.
3. Select **Defined** in report type.
4. In **Report Groups Tree** to view imported Scheduled Reports, scroll down and click **HP ProCurve Switch** group folder.

Scheduled Reports are displayed in the Reports configuration pane.

The screenshot shows the 'REPORTS CONFIGURATION' screen. On the left, a tree view lists various report groups, with 'HP ProCurve Switch' highlighted by a red box. The main panel displays 'REPORTS CONFIGURATION >> HP PROCURVE SWITCH'. It shows a table with three rows of reports, each with a checkbox, title, creation date, modification date, and edit/delete icons. The first two rows are highlighted with a red box.

	TITLE	CREATED ON	MODIFIED ON
<input type="checkbox"/>	<a href="#">HP ProCurve-User Logon Details</a>	9/21/2015 05:35:06 PM	9/23/2015 03:43:11 PM
<input type="checkbox"/>	<a href="#">HP ProCurve-Security Violation Details</a>	9/16/2015 05:37:08 PM	9/23/2015 03:46:05 PM
<input type="checkbox"/>	<a href="#">HP ProCurve-Port Status Change Details</a>	9/16/2015 04:21:31 PM	9/23/2015 05:15:35 PM

Buttons at the bottom right include 'Delete' and 'Move to group'.

Figure 19

**NOTE:** Please specify appropriate **systems** in **report wizard** for better performance.

## Verify Token Templates

1. Click the **Admin** menu, and then click **Parsing rule**.
2. Select **Template** tab.
3. Scroll and find imported **HP ProCurve Switch** token templates.

**PARSING RULE**

**Parsing Rule** **Template**

## Create Dashboards in EventTracker

### Schedule Reports

1. Open **EventTracker** in browser and logon.

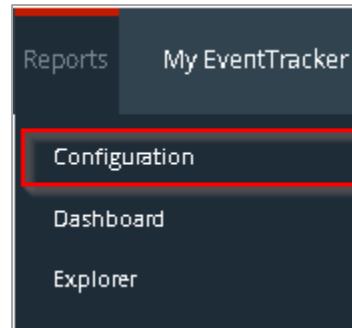

Figure 22

2. Navigate to **Reports>Configuration**.

The screenshot shows the 'REPORTS CONFIGURATION' screen. At the top, there are three radio buttons: 'Scheduled' (unchecked), 'Queued' (unchecked), and 'Defined' (checked, highlighted with a red box). To the right is a search bar with a magnifying glass icon and a calendar icon.

The left side features a tree view under 'REPORT GROUPS' containing various network device and service names. One item, 'HP ProCurve Switch', is selected and highlighted with a red box.

The main right panel is titled 'REPORTS CONFIGURATION >> HP PROCURVE SWITCH'. It displays a table with three rows of report details:

<input type="checkbox"/>	TITLE	CREATED ON	MODIFIED ON
<input type="checkbox"/>	<a href="#">HP ProCurve-User Logon Details</a>	9/21/2015 05:35:06 PM	9/23/2015 03:43:11 PM
<input type="checkbox"/>	<a href="#">HP ProCurve-Security Violation Details</a>	9/16/2015 05:37:08 PM	9/23/2015 03:46:05 PM
<input type="checkbox"/>	<a href="#">HP ProCurve-Port Status Change Details</a>	9/16/2015 04:21:31 PM	9/23/2015 05:15:35 PM

At the bottom right of the panel are two buttons: 'Delete' and 'Move to group'.

Figure 23

3. Select **HP ProCurve Switch** in report groups. Check **defined** dialog box.
4. Click on 'schedule' to plan a report for later execution.

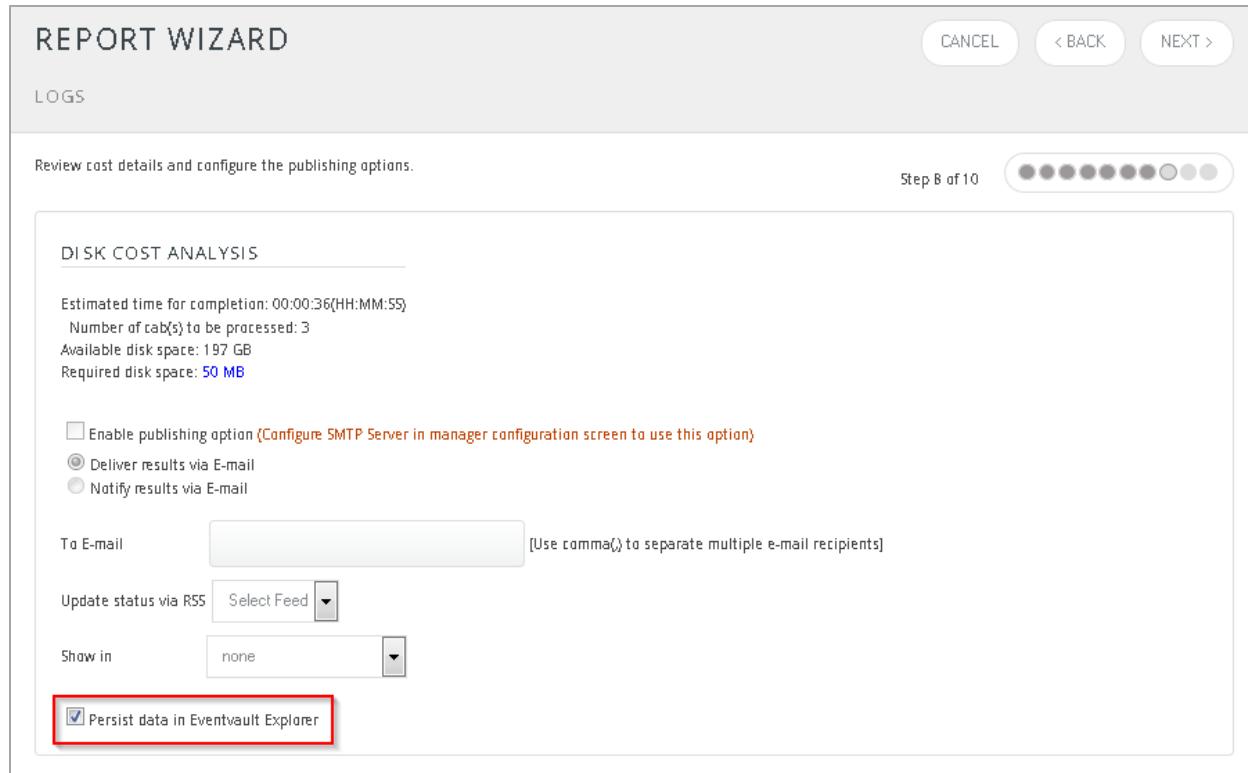

Figure 24

5. Choose appropriate time for report execution and in **Step 8** check **Persist data in Eventvault explorer** box.

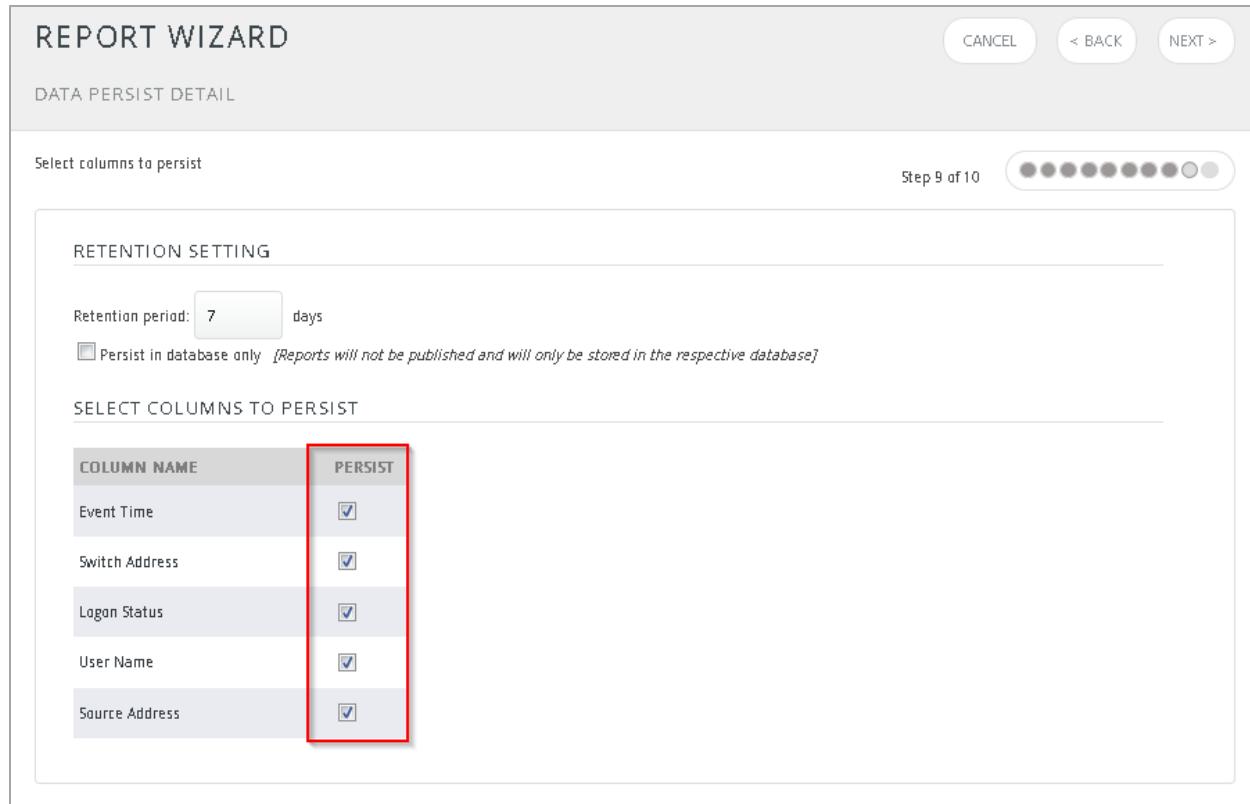

Figure 25

6. Check column names to persist using 'PERSIST' checkboxes beside them. Choose suitable **Retention period**.
7. Proceed to next step and click **Schedule** button.
8. Wait for scheduled time or generate report manually.

## Create Dashlets

1. **EventTracker 8** is required to configure flex dashboard.
2. Open **EventTracker** in browser and logon.

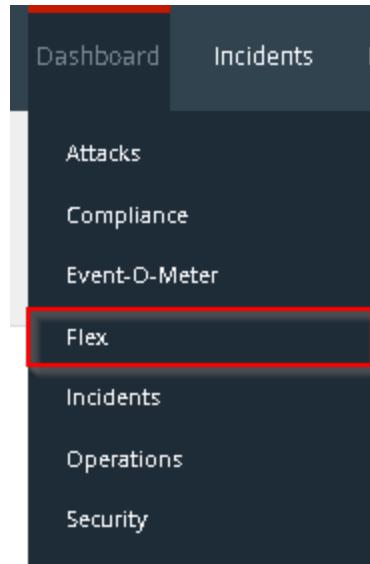

Figure 26

3. Navigate to **Dashboard>Flex**.

Flex Dashboard pane is shown.

A screenshot of the 'FLEX DASHBOARD' configuration pane. At the top, there is a navigation bar with links for 'Dashboard', 'Incidents', 'Behavior', 'Status', 'Search', 'Reports', 'My EventTracker', 'Change Audit', and 'Config Assessment'. Below this is a title bar labeled 'FLEX DASHBOARD'. On the right side of the title bar is a toolbar with several icons. The main area contains a text input field with the placeholder 'HP ProCurve Switch' and a description text area below it containing the text ',HP 2920,HP 3500,HP 3500zl,HP 3800,HP 5400zl,HP 6200yl & HP 8200zl'.

Figure 27

4. Click to add a new dashboard.

Flex Dashboard configuration pane is shown.

A screenshot of the 'CUSTOM DASHBOARD' configuration pane. It has a title bar labeled 'CUSTOM DASHBOARD'. Below it is a form with fields for 'Title' (containing 'HP ProCurve Switch') and 'Description' (containing ',HP 2920,HP 3500,HP 3500zl,HP 3800,HP 5400zl,HP 6200yl & HP 8200zl'). At the bottom are three buttons: 'SAVE', 'DELETE', and 'CANCEL'.

Figure 28

5. Fill fitting title and description and click **Save** button.
6. Click  to configure a new flex dashlet.  
Widget configuration pane is shown.
